Total :		\$

Including taxes, T.V.A. not applicable, article 293 B of french Tax code

To get the license:

Fill the inquiry and quotation forms with chosen models sets, total amount in USD, and signature.
Send these documents with an order form from your company, school, college or university to :

AZprocede, 11 chemin du Manel, 31400 Toulouse, FRANCE

You will receive :

- by mail : 3 copies of invoice (and the CD if applicable),
 - by email : software key file that, together with user name, allow to run model set for two years.
- Remark : email address where the software key file will be sent is specified in the Inquiry form.
The AZprocede setup is downloaded from website (or on the CD if applicable).

Warranty limitations:

Besides the Terms of use given with the software, applicable warranty limitations are following :

- Software run under Windows operating system (98, XP...), and require at least a 800Mhz CPU and 128Mo of RAM. However, the software has to be tested on your hardware before ordering since no reclamation about software running on your hardware will be accepted after licensing.
- Software is downloaded from website and no physical support is given when licensing, except if specified « With CD » in quotation form.
- The software can be installed on a computer network, but only if network serve only one site location, otherwise quotation should be discussed before. Network install can require users profile modifications, and has to be done by an administrator. No warranty of any kind is given for the software to run under your network, as configuration may vary from one network to another. User profile modification is enough for most install. A setup program specifically designed for network install is given only with the CD version..

"With CD" version: for \$79, a CD is sent by mail. This CD contains:

- the setup program (or install program) for all AZprocede models sets,
- a file including license number and keys unlocking the software for the 2 years period,
- a network setup program specifically designed for network install.
